

Morris County Office of Emergency Management

invites you to attend the following course offering:

BLEEDING CONTROL FOR THE INJURED ADVANCED TRAINING PROGRAM

4 HOUR TRAINING COURSE

3 CEUS APPROVED

The Bleeding Control for the Injured (B-Con) Advanced Training Program teaches participants basic life-saving medical interventions, including bleeding control with a tourniquet, bleeding control with hemostatic gauze packs or topical hemostatic agents, and the skills necessary to open an airway in order for a casualty to breathe. The course is designed for *all first responders*.

It is designed for those with little to no medical training, but whom may be called upon to respond to an incident to deliver emergency care before a casualty is able to receive treatment at a medical facility.

The program will run as follows:

- A classroom-based educational training structured as an introduction to bleeding control skills that are necessary to treat a casualty in an austere environment. Also included, are lessons with concepts provided in The Hartford Consensus: Medical Response to Trauma, where students are given an overview of active shooter incidents and the life-saving importance of initial emergency care.
- A practical exercise module with various training stations that focus on the hands-on application of each item provided within the IFAK, as follows:
 - ❖ Airway Management
 - ❖ Wound Packing
 - ❖ Tourniquet and Junctional Wound Care
- 10 question examination based on the program in its entirety
